PROFILE SUMMARY

Fresh graduate with a Bachelor's degree in Informatics Engineering, with interests in technology, programming, administration, graphic design, and video editing. Experienced in developing web-based projects (PHP & MySQL) and Android applications (Java), and familiar with the UI/UX design process. Open to opportunities in both IT and operations, and eager to learn and grow professionally.

EDUCATION

Universitas Pamulang South Tangerang, Indonesia

Faculty of Computer Science *September 2022 – Agustus 2026*

● GPA 3,64/4,00 – Major: Informatics Engineering

PROJECT EXPERIENCE

WFH Graphic Designer & Video Editor (Arfer Studio) *September 2026 – Sekarang*

Canva, Adobe Express, Figma, CapCut Desktop Pro

- Media Graphic Design: Designed promotional visuals, Instagram, TikTok, and YouTube posters, Mobile Legends tournament announcements, diamond and skin price lists, and daily social media content.
- Video Production & Editing: Produced a variety of creative videos, including tournament teasers, highlight videos, meme/funny videos, and esports match recaps.
- Live Streaming Design: Created visual assets for team live streams, including player name lower thirds, backgrounds, and other interactive graphic elements.
- Web Development & Layout: Updated and redesigned the live streaming web layout to be more modern and interactive, and planning to develop the Arfer Studio web platform with top-up features, tournament information, and a registration system.

M-Smart — Student Financial Management App *2026*

Android Developer | Java, Android Studio, SQLite, Firebase Authentication

- Developed an Android application for manual and receipt-OCR transaction recording, with multi-bank/e-wallet support and a split bill feature.
- Built an SPK (Decision Support System) Assistant using the MOORA method to recommend spending priorities based on urgency, impact, fund availability, frequency, and cost.
- Added financial trend graph reports, savings targets, an agenda with reminders, notes, tiered reminders and notifications, and a home screen widget.
- Applied the UI/UX design process and application development from the planning stage through implementation.

Hotel Management System (MDW Hotel) *2026*

Full-stack Developer | PHP, MySQL

- Designed and developed a 3-role system (Admin, Receptionist, Guest) to automate hotel booking, check-in/check-out, and payment processes.
- Built online booking, payment, order history, and a real-time revenue statistics dashboard.
- Developed room management, reporting, and user account management modules for admins.

Online Registration & Tuition Payment System— PAUD Al-Hikmah *2025*

Internship Project — Full-stack Developer | PHP, MySQL

- Built a school information website along with an online registration system and tuition (SPP) payment via bank transfer for PAUD Al-Hikmah.
- Developed an admin panel to manage new student admission (PPDB) data, student data, alumni, gallery, quizzes, and student accounts.

Sales Invoice Information System *2025*

Full-stack Developer | PHP, MySQL

- Developed a sales invoice management system with login, sales data entry, and transaction reporting features.

Cloud Computing — WordPress Deployment (VPS & AWS) *2024*

Web Server & Database Configuration (Tim) | Apache, PHP, WordPress, AWS RDS, MariaDB

- Configured an IaaS-based web server and a PaaS-based database server for WordPress deployment across two VPS instances.

ACTIVITIES & COMMUNITY SERVICE

PKM — SMP Fajar Ciseeng *2024*

Speaker

- Served as a presenter in an awareness session themed "Overcoming Excessive Gadget Use Among Junior High School Students" to raise students' awareness of healthy and productive gadget use.

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, Java, Python, PHP

Tools & Platform: Visual Studio Code, Android Studio, Apache NetBeans IDE, MySQL, SQLite, Firebase

Desain: Canva, Adobe Express, Figma (dalam proses pendalaman)

Video Editing: CapCut Desktop Pro

Produktivitas: Microsoft Office (Word, Excel, PowerPoint), Google Spreadsheet

KEAHLIAN NON-TEKNIS

Keterampilan Komunikasi, Manajemen Waktu, Kreativitas, Kerja Tim, dan Berpikir Kritis untuk mendukung efisiensi kerja.

SERTIFIKAT

- BNSP Certified Programmer — LSP Unpam (June 2026)
- Getting Started with Programming Using Python — Dicoding (June 27, 2026)
- Machine Learning for Beginners — Dicoding (June 27, 2026)
- Self-Development Strategies — Dicoding (June 26, 2026)
- Prompt Engineering for Software Developers — Dicoding (June 22, 2026)
- AI Fundamentals — Dicoding (June 21, 2026)
- Introduction to Financial Literacy — Dicoding (May 31, 2026)
- Frontend in Website Development — MySkill Short Class (December 2024)
- JavaScript Intermediate — Sololearn (December 14, 2024)
- Introduction to JavaScript — Sololearn (December 5, 2024)
- Introduction to CSS — Sololearn (December 4, 2024)
- Introduction to HTML — Sololearn (November 27, 2024)
